## ***INJURIES ARE EXERCISE-AGNOSTIC***

### **CROSSFIT**

"...(73.5%) HAVING SUSTAINED AN INJURY DURING CROSSFIT TRAINING."

### **YOGA**

"YOGA CAUSES MUSCULO-SKELETAL PAIN IN 10% OF PEOPLE AND EXACERBATES 21% OF EXISTING INJURIES..."

### **HIIT**

"FINDINGS FROM A DESCRIPTIVE SURVEY SHOW THAT IN A HIIT EXERCISE REGIMEN... YIELDING AN INJURY PREVALENCE OF 46.5%..."

### **POWERLIFTING**

"63.9% OF THE RESPONDENTS REPORTED HAVING AN ACUTE POWERLIFTING-RELATED INJURY DURING THEIR POWERLIFTING CAREER."

# ***BUT COMPETITORS ARE NOT CAPITALIZING ON ALL THE OPPORTUNITIES POSSIBLE IN THE SPACE... UNLIKE VERUM***

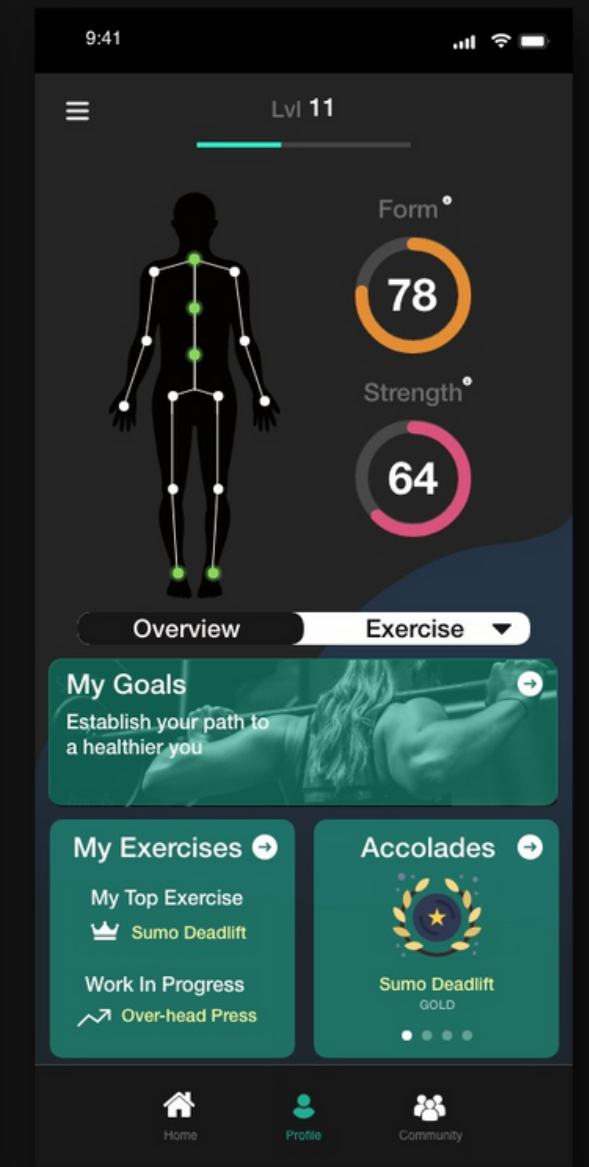

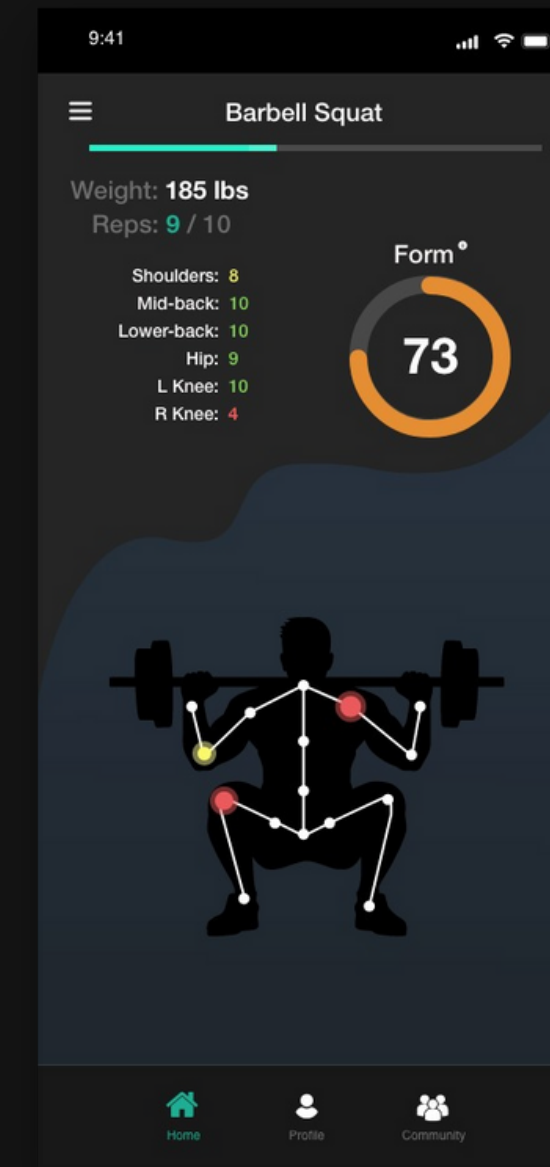

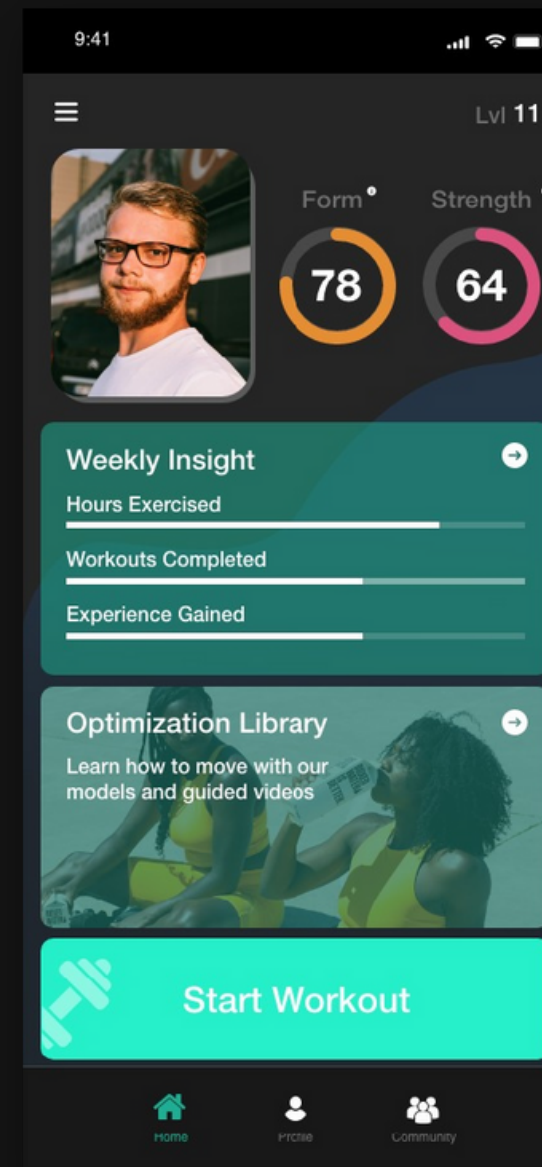

- Non-Intrusive Technology that utilizes a high-fidelity 3D modeling algorithm
  - Unrestricted access to review historic workouts and 3D models
  - Gamified user experience that rewards progress and nurtures development
  - Actionable insights as a person exercises for real-time improvement
- 

# *SOLUTION*

## VERUM'S ELEVATE IS THE MOST MOBILE AND SOPHISTICATED 3-D MODELING SOFTWARE FOR YOUR FITNESS JOURNEY

Verum uses a combination LiDAR and Optical sensors, computer vision, machine learning, and an open ecosystem to immerse individuals into a comprehensive training supplement to reduce the risk of injury as a person exercises.

# USER EXPERIENCE

## USER INSIGHTS

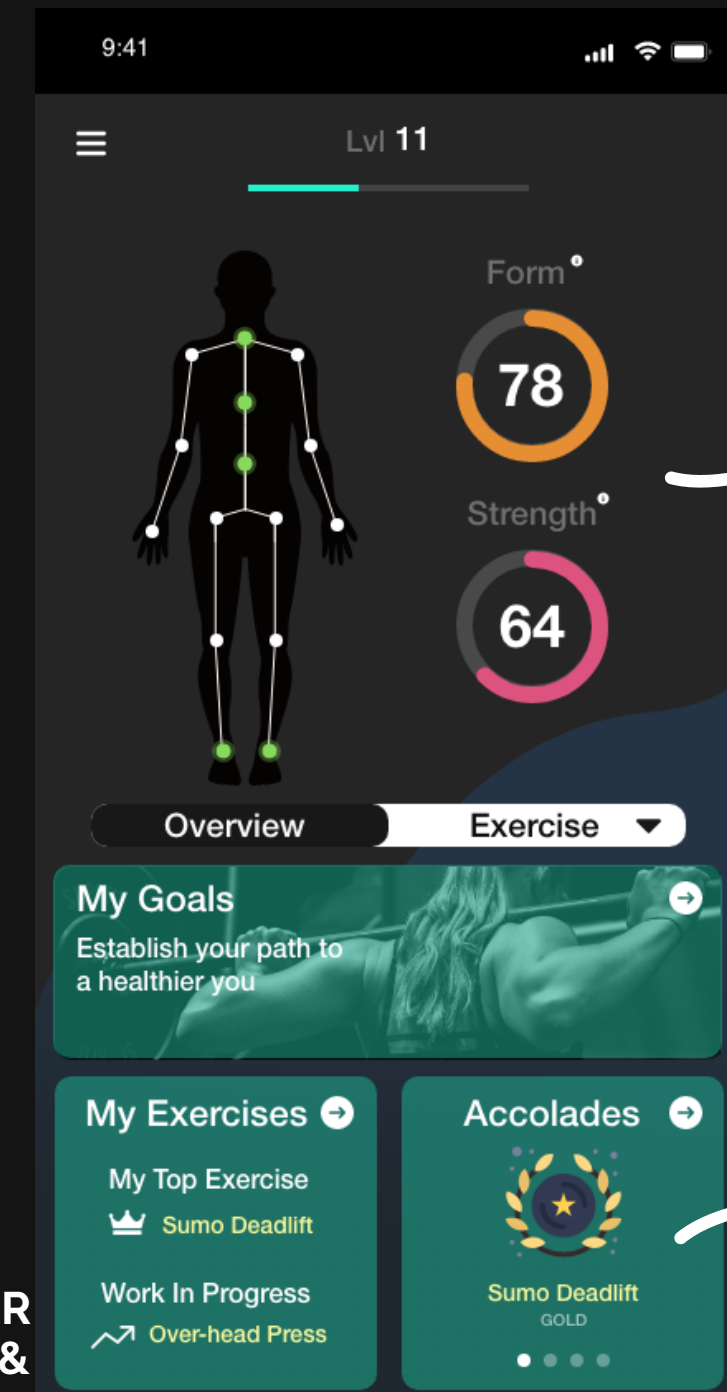

- PERSONALIZED INSIGHTS ON MOVEMENT
- SEE ADVANCED METRICS

## LEARN TO MOVE

- ARTICLES ON MOVEMENT AND HEALTH
- GUIDED VIDEOS ON HOW TO PERFORM MOVEMENTS

## MIRROR USER MOVEMENT & PROVIDE INSIGHTS IN REAL TIME

## VISUALIZE PROGRESS

- PERSONAL FORM & STRENGTH SCORES
- VISUALIZATION OF STRENGTHS & WEAKPOINTS

## GAMIFICATION

- ACCOLADES
- COMMUNITY ENGAGEMENT
- LEVEL UP & GROWTH

# ***LONG-TERM DEVELOPMENT GOALS***

## **Machine Learning**

Update skeletonization to include a 32-point model

Suggestive insights to improve movement

Observe movement trends with data analytics

Increase # of movements observable by algorithm

## **User Experience**

Introduce gamification to motivate users and provide a holistic experience

Develop a library of informative material on optimizing movement

Improve 3D visualization to display more information in real time

# ***BUSINESS MODEL***

## **Affordable Upfront Costs**

Partners will purchase our sensors at cost

## **Ecosystem and Software Annual Subscription**

Based on the number of users a gym has, a subscription tier will be purchased for access to ecosystem and skeletonization software

## **Technical Innovation**

Using our high-fidelity 30+ point skeletonization model, Verum will sell collected data to companies like Fitbit and Apple

**Long Term:** In-App Purchases and Extension Packages based on Athletic Level

# ***WHY PARTNERS WANT VERUM***

**01**

Gamification of working out leads to a more fun and engaged experience for their users

**02**

People who use the technology will have more bang for their buck due to the fitness tracking and movement optimization tools

**03**

Users are more likely to stay at their gym knowing that there are resources that help reduce their fear of getting injured

# Pilot Testing Experimentation

All Groups will test Deadlift, Bench Press, and Barbell Squat	Group 1 - Bodyweight at High Repetitions (Hypertrophy training)	Group 2 - High Volume (Strength Training)	Group 3 - 1 Repetition Max
Weight Levels	A weight the lifter is confident they will get 20 repetitions	50,60,70,80,90, % of 1RM	1-3 rep warm ups of 50,60,70,80,90, and finally 100% 1RM
Repetition Ranges	12-20 Repetitions	3-5 Repetition at each weight	1-3 Repetitions at max possible weight
Info the Experiment Group will Provide	Find the point where form falls apart due to fatigue	Find the deterioration of form as Weight Increases	Find failure points in form, as they are most prominent during a Max Lift

- GOALS:**
- 1. DETERMINE POINTS OF FORM DETERIORATION BASED ON TYPE OF WEIGHTLIFTING ACTIVITY
  - 2. VALIDATE SKELETONIZATION MODEL WITH REAL-TIME FEEDBACK
  - 3. BETTER UNDERSTAND HOW USERS INTERACT WITH THE PRODUCT/ECOSYSTEM
